- 8.2 The Chairman invited questions from shareholders.

8.3 **Question/Comment 1**

A shareholder asked if the Company was planning to expand the smart letterboxes to other areas.

The Chairman invited Mr Vincent Phang to address the question. Mr Vincent Phang updated that a couple of trials on smart letterboxes were being deployed in Clementi, and the responses and reception had been positive. The trials allowed customer's feedback be factored in and for operations to continue tweaking the process. Mr Vincent Phang added that it was important to obtain all the feedback and add considerations around customer's experience from the field as well as the productivity gain from the deployment of such boxes. Mr Vincent Phang said results from the trials would be built-in and necessary approvals from the regulator for the final rollout would be procured in due course.

8.4 **Question/Comment 2**

A shareholder asked if the Company is profitable.

In response to the shareholder's question, the Chairman said SingPost had been profitable last financial year and is expected to remain profitable in the current financial year. The Chairman reminded that shareholders should have realistic expectation given the conditions, challenges and issues as described by Management around COVID-19 and the situation at Changi Airport. Summary of Segmental POA Performance

International margins largely eroded due to air freight disruption; Higher Domestic Covid-19 related costs, partly offset by strong growth in Domestic eCommerce logistics contribution

Increased adoption of eCommerce activities in Asia-Pacific resulted in more customers coming on board for eCommerce logistics solutions – leading to improved revenue & economies of scale

Largely due to rental rebates provided for eligible tenants in the first half of the year, as well as lower receipts from car-park and atrium sales

Higher largely due to reversals of one-off expenses last year. Excluding this, the Others segment remained stable.
